WCSR DELAYED

Eleanor Echikson, technical head of WCSR, announced yesterday that Radio Smith would not go on the air tonight.

The difficulties and delays center around the faulty construction of a steel box measuring six inches on each edge, and known in electrical circles as a transformer. Because of the use of poor steel in constructing this box, an electrical leak is causing over-modulation. This would result in the Smith listener being able to pick up the broadcast at around 450 on the radio dial which would block out any other station in that dial area that you wanted to hear at the same time.

This, then, is the reason for WCSR's delay. It will be settled within two weeks and then definitely and positively Radio Smith will be an actuality.
